# csd-380

## Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository](#).

Required fields are marked with an asterisk (\*).

Owner \*

 nmemarcoding ▾

Repository name \*

/ csd-380

✔ csd-380 is available.

Great repository names are short and memorable. Need inspiration? How about [expert-tribble](#) ?

Description (optional)

Public

Anyone on the internet can see this repository. You choose who can commit.

Private

You choose who can see and commit to this repository.

Initialize this repository with:

Add a README file

This is where you can write a long description for your project. [Learn more about READMEs](#).

Add .gitignore

.gitignore template: None ▾

Choose which files not to track from a list of templates. [Learn more about ignoring files](#).

Choose a license

License: None ▾

A license tells others what they can and can't do with your code. [Learn more about licenses](#).

This will set  main as the default branch. Change the default name in your [settings](#).

 You are creating a public repository in your personal account.
